DETAILED ACTION

Election/Restrictions

1. It should be noted that the election of the previous Restriction requirement mailed on 10/3/08 still holds. Based on the amendment to the claim 1, in order to understand & appreciate the scope of the invention, and considering the inventive subject matter for a specific species, further species restriction requirement is necessitated. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

A: Figs. 1-5,

B: Figs. 6-9,

C: Figs. 10-13,

D: Fig. 14-16,

E: Figs. 17-18,

F: Fig. 19,

G: Figs. 20-22.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner: (as best understood – the earlier withdrawn claims are mentioned in the bracket)

A: Figs. 1-5, Claims: 1, 3, 5, (2, 4, 6-7, 17-18),

B: Figs. 6-9, Claims: 3, 5 (as coupling member different than the gear system)

C: Figs. 10-13, Claims: 1, 3, 5, (2, 4, 6-7, 17-18),

D: Fig. 14-16, Claims: 3, 5 ((as coupling member different than the gear system)

E: Figs. 17-18, Claims: 1, 3, 5, (2, 4, 6-7, 17-18),

F: Fig. 19, Claims (8-11), and

G: Figs. 20-22, Claims 1, 3, 5, (2, 4, 6-7, 17-18),

The following claim(s) are generic: None.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Each species teaches a unique technical feature of the drive mechanism to generate and transfer periodical reciprocating motion to the shaving head.

4. A telephone call was made to the Applicant/s representative (Mr. G. Thorne, Reg. # 39398) on 9/25/09 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
